

THE CLIPPER EXPERIENCE

A thoughtful alternative to conventional cruises

Our 100-passenger *Nantucket Clipper* is specifically designed for cruising in coastal waters, bringing you close up to places of natural beauty and cultural interest. Her easy maneuverability and shallow draft allow us to explore secluded waterways beyond the reach of bigger ships. A fleet of Zodiac landing craft can be launched in minutes for spontaneous landings on small islands and deserted beaches.

The lifestyle on board our ship is casual and unregimented, with an intimate ambience that is conducive to camaraderie. Not for us the crowds, hectic gaming activities, and commercial atmosphere encountered on conventional cruise ships. We do not offer bingo or gambling.

The spirit of adventure and discovery fostered on board is enhanced by a generous measure of comfort and attractive interior design. Staterooms are all-outside and fully air-conditioned, with lower beds and private bathrooms. The spacious Observation Lounge and elegant dining salon are window-lined so that the outside world is always in view.

Even the food served aboard the *Nantucket Clipper* adds to the experience of traveling to new places. It is healthful, nutritious American food, influenced by regional culinary traditions and prepared freshly to order, on the principle of "excellence through simplicity." You will enjoy a single leisurely seating and be served by our friendly young American staff.

A historian and guest speakers accompany our voyage. They will explain and recap the day's events in informal talks. Their expertise will enhance your enjoyment of the areas visited.

To safeguard the health of our passengers, Clipper maintains a no-smoking policy in the interior areas of the ship.
